FullStack Software Engineer - C# .Net/AngularJS

Company Name Smart AdServer - Full Stack Ad Technology Platform
Company Location Région de Nantes, France

Posted Date Posted 7 days ago Number of views 228 views

Job description

Do you have every web browser that exists set-up on your computer? Do you like to
model complex problems to build efficient interfaces? Are you always counting the number of clicks when you
browse a web site? Do you think you can change the world by creating perfect web interfaces?

If your answers are YES to all of these questions, you are more than welcome to join our **Software Engineering
Team in our Nantes City Center (or in Paris 9e) office** to develop all of your ideas, and much more!

Your Missions

As part of a team in charge of developing the main product of the company, your missions will be to:

- Develop and design the ergonomic Web interface in a .NET (WebForm and MVC) and JavaScript
  (AngularJS) environment to simplify users' lives.
- Drive test sessions, set up automated tests, etc.
- Get involved in the development of prototypes and design examples based on user's needs.
- Share your expertise with other developers on your team and the company.

Requirements

Having graduated with a master's degree in computer science or the equivalent, you have at least 2 years'
experience in web development in C#/ASP.Net (or Java and ready to move into a C# stack) and with the Front-
End full-stack (Angular.JS, HTML5, CSS3, JavaScript, JQuery).

You have developed ergonomic and efficient interfaces in a user-oriented way, have a solid foundation in object-
oriented programming, and are familiar with data access and caching technologies.

You are interested in new technologies and new frameworks such as AngularJS, JQuery, Node.JS, Compass,
etc.

You have an entrepreneurial spirit, know how to identify opportunities of improvement, as well as suggest,
implement, and test them straight away.

You are able to communicate well in English, both written and spoken.
